PROFESSIONAL SUMMARY

Results-driven Software Engineering student with experience building scalable full-stack applications and AI-driven solutions. Expert in developing RESTful APIs, managing relational and non-relational databases, and implementing automated testing. Proven track record in designing multi-tenant systems and integrating third-party services (Stripe, Twilio). Passionate about software architecture, performance optimization, and building robust SaaS products.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, C#, C++

Frameworks: Spring Boot, Angular, Django, React

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Docker, Kubernetes, Linux

Cloud: AWS, Google Cloud, Azure

WORK EXPERIENCE

Software Developer | Datax S.R.L.

Jan 2026 – Present

- Designed and developed an AI Data Ingestion Agent to automate complex workflows.
- Utilized advanced analysis tools to audit and process over 200 technical reports, improving data accuracy.
- Collaborated on backend architecture to ensure system scalability and efficiency.

AI Developer | Yeison

2025 – Present

- Engineered automated sales agents and decision-support systems using LLMs.
- Developed multi-tenant WhatsApp agents for customer engagement, focusing on high availability and seamless integration.

Tech & Network Lead | Ferreteria America

2024 - 2026

- Led the end-to-end design and deployment of the corporate web platform.
- Managed network infrastructure and routing for multiple branch locations, ensuring 99.9% uptime.

KEY PROJECTS

ENCUADRADOS – E-commerce & CRM Platform

Stack: React, Node.js, WhatsApp API

- Developed a full-scale web application for sales with an integrated WhatsApp service for real-time notifications.
- Built a comprehensive data visualization dashboard to track business KPIs.

Bookstore Management System – Microservices

Stack: C#, .NET, Razor Pages, JWT

- Architected a microservices-based inventory management system.
- Implemented secure authentication using JWT and developed a real-time data monitoring dashboard.

EDUCATION

B.S. in Systems Engineering

Universidad Católica Boliviana (UCB) | 2022 – 2026 (Current: 9th Semester)

High School Diploma

Colegio Aleman Federico Froebel | 2007 – 2021
